

DESFLEX WEAVING & BRAIDING

For over 15 years we have been manufacturing custom braids for a wide variety of industries. We have manufactured braids for high profile fashion brands, for set designs for various american movie productions, as well as for several famous independent designers in the apparel industry.

Depending on the design and materials used our braids are also used in automotive applications, airplanes, and High End Hi-Fi on Power cables, Audio Internconnects and other custom projects.

Each braid can be customized to our clients needs and application in a wide variety of colours in both polyester, and PET monofilament. We utilize several types of braiding and weaving machines to achieve unique designs not seen

Note:

- * Sizes range from 3mm-50mm before applied or in unexpanded state
- * PET braids can expanded 150% or more the original size depending on:
 1. Number of color tracers used in the braid
 2. Braid design in regards to coverage
 3. Type of material used in the tracer. Example: PET Fiber vs. PET monofilament
- * Leadtime for non-stock or custom braids is 12 working days
- * Braids are supplied on 50m/100m or 500m paper spools
- * Please feel free to ask our sales staff regarding sizes and designs which best fit your project
